

TO WHOM IT MAY CONCERN

For the past eight years I have worked with John Mc Clain, who, as my Audio Producer/ Engineer, has shown himself to be exceedingly professional, diplomatic, creative and very Production savvy in his understanding of deadlines and budget.

In my Production of Corporate Convention Opening Videos for clientele such as Intel Corporation, IBM and EMC, we have had the challenge of combining wildly divergent Audio sources from all over the world, and Mixing them with Music and EFX to create exciting and powerful video pieces, several of which have won Industry Telly and Aurora Awards.

Originally I worked with John when he managed a Studio in an Industrial Complex. His Home Studio is far superior, with little extras like a full Fridge, Swimming Pool, and lots of Doggie and Kitty attention, if you are so inclined. Seriously, his studio is now equipped with the latest Technology, and with John we have access to Voice Over talent from all over the world. His ability to move Music and Mix files through Swap Drive saves me countless hours and greatly speeds up the Edit Process with our intense production deadlines.

I would highly recommend Dog and Pony Studios, as John and the Studio are the best in Las Vegas.

Sincerely,

Dona Shatford Peters
